

		Nursery	Reception	Years 1 & 2	Years 3 & 4	Years 5 & 6
Working Scientifically	Questioning & Predicting	 Begin to engage in open- ended activity and exploring with adult support Begin to handle tools safely such as scissors Talk through a problem with an adult and how they can overcome this Talk to an adult about the resources that they would like to use. Follow adults' lead with 'I wonder' questions 	 Engage in open-ended activity playing and exploring Take a risk, engage in new experiences and learn by trial and error Find ways to solve problems/ find new ways to do things/test their ideas Handle equipment and tools effectively Choose the resources they need for their chosen activity Create simple representations of events, people and objects Answer how and why questions about their experiences 	 Ask simple questions Use observations and ideas to suggest answers to questions 	 Ask relevant questions Start to make predictions Make sensible predictions Suggest possible further questions Use straightforward scientific evidence to answer questions and support their findings 	 Use test results to make appropriate, linked predictions and ask further questions Recognise when other sources of information (secondary sources) will help answer questions that cannot be answered through practical investigations Make predictions for new values Use a range of sources to support own evidence and talk about how scientific ideas have developed over time Evaluate the reliability of their methods and suggest improvements Identify scientific evidence that has been used to support or refute ideas or arguments
	Planning & Carrying Out Investigations			 Recognise that questions can be answered in different ways Perform simple tests Carry out pre-planned investigations – with support 	 Use different types of scientific enquiries to answer questions Set up simple practical enquiries Set up simple comparative tests Set up fair tests Identify differences, similarities or changes related to simple scientific ideas and processes 	 Plan different types of scientific enquiries to answer questions – including recognising and controlling variables where necessary Suggest sensible improvements to experiments Set up further comparative and fair tests in response to results

		Nursery	Reception	Years 1 & 2	Years 3 & 4	Years 5 & 6
Scientifically	Taking & Recording Observations, Measurements and Results	 Begin to engage in open- ended activity and exploring with adult support Begin to handle tools safely such as scissors Talk through a problem with an adult and how they can overcome this Talk to an adult about the resources that they would like to use. Follow adults' lead with '1 wonder' questions 	 Engage in open-ended activity playing and exploring Take a risk, engage in new experiences and learn by trial and error Find ways to solve problems/ find new ways to do things/test their ideas Handle equipment and tools effectively Choose the resources they need for their chosen activity Create simple representations of events, people and objects Answer how and why questions about their experiences 	 Observe closely Use simple equipment Gather and record data to help answer questions – with support 	 Start to make systematic and careful observations Take accurate measurements using standard units Gather and record data to help answer questions Start to record findings using simple scientific language Make systematic and careful observations Take accurate measurements using standard units using a range of equipment including thermometers and data loggers Record findings using simple scientific language – demonstrate through drawings, labelled diagrams, keys, bar charts and tables 	 Take accurate, precise measurements using appropriate equipment Know and explain when it is appropriate to take repeat measurements Gather, record, classify and present data in a variety of ways including scientific diagrams and labels, keys, graphs and tables Choose the most appropriate method for recording data and results of increasing complexity Make a series of observations, comparisons and measurements with precision
Working (Explaining Results & Drawing Conclusions			 Talk about what they have found out Start to use simple scientific language in context Identify and classify objects as part of an investigation 	 Report back on findings verbally Form conclusions from findings Suggest improvements to investigations Use straightforward scientific evidence to answer questions Classify and present data in a variety of ways to help in answering questions Report back on findings verbally and through written explanations, displays, presentations etc Form sensible conclusions from findings 	 Use scientific evidence to answer questions Use scientific evidence to support findings Use results to draw conclusions Present observations and data using appropriate methods Report and present results including conclusions, causal relationships and explanations Make conclusions consistent with evidence and related to scientific understanding

		Nursery	Reception	Years 1 & 2	Years 3 & 4	Years 5 & 6
Physics	Everyday Materials	✓ Talk about the differences between materials and changes they notice	 Ongoing discussions of different materials that the children use in their learning and play Learn the term waterproof and identify plastic and metal 	 Distinguish between an object and the material from which it is made Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water and rock Describe the simple physical properties of a variety of everyday materials Compare and group together a variety of everyday materials on the basis of their simple physical properties Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching 		
	Light		 Notice light and dark places in the immediate environment Begin to compare light and dark Look at shadows and the shapes that they make 		 Recognise that light is needed in order to see things and that dark is the absence of light Notice that light is reflected from surfaces Recognise that light from the sun can be dangerous and that there are ways to protect their eyes Recognise that shadows are formed when the light from a light source is blocked by an opaque object Find patterns in the way that the size of shadows change 	 Recognise that light appears to travel in straight lines Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them

		Nursery	Reception	Years 1 & 2	Years 3 & 4	Years 5 & 6
Physics	Forces & Magnets	✓ Explore and talk about different forces they can feel			 Compare how things move on different surfaces Notice that some forces need contact between two objects, but magnetic forces can act at a distance Observe how magnets attract or repel each other and attract some materials and not others Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet and identify some magnetic materials Describe magnets as having two poles Predict whether two magnets will attract or repel each other 	 Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object Identify the effects of air resistance, water resistance and friction, that act between moving surfaces Recognise that some mechanisms including levers, pulleys and gears allow a smaller force to have a greater effect
	Sound		 Explore making sounds in a variety of different ways. 		 Identify how sounds are made, associating some of them with something vibrating Recognise that vibrations from sounds travel through a medium to the ear Find patterns between the pitch of a sound and features of the object that produced it Find patterns between the volume of a sound and the strength of the vibrations that produced it Recognise that sounds get fainter as the distance from the sound source increases 	

		Nursery	Reception	Years 1 & 2	Years 3 & 4	Years 5 & 6
Physics	Electricity				 Identify common appliances that run on electricity Construct a simple series electrical circuit identifying and naming its basic parts including cells, wires, bulbs, switches and buzzers Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit Recognise some common conductors and insulators, and associate metals with being good conductors 	 Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches Use recognised symbols when representing a simple circuit in a diagram
	Earth & Space					 Describe the movement of the Earth and other planets relative to the sun in the solar system Describe the movement of the moon relative to the Earth Describe the sun, Earth and moon as approximately spherical bodies Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky

		Nursery	Reception	Years 1 & 2	Years 3 & 4	Years 5 & 6
	Seasonal Changes	 Talk about when it is icy and notice that this is when it is very cold. 	 Talk about changes that happen in their immediate environment in different seasons 	 Observe changes across the four seasons Observe and describe weather associated with the seasons and how day length varies 		
Biology	Animals	 Observe animal lifecycles such as caterpillars hatching and becoming butterflies Discuss animals of their choice, focussing on what they look like 	 Describe animals that they have seen in stories, videos or in person, focusing on what they eat and where they live 	 Identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals Identify and name a variety of common animals that are carnivores, herbivores and omnivores Describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals including pets) Notice that animals, including humans have offspring which grow into adults Find out about and describe the basic needs of animals, including humans, for survival (water, food, air) 	 Identify that animals, including humans, need the right types and amount of nutrition and that they cannot make their own food - they get nutrition from what they eat Identify that humans and some other animals have skeletons and muscles for support, protection and movement Construct and interpret a variety of food chains, identifying producers, predators and prey 	 Describe the ways in which nutrients and water are transported within animals (including humans)

		Nursery	Reception	Years 1 & 2	Years 3 & 4	Years 5 & 6
gy	Humans	✓ Name common body parts – head, arms, hands, legs feet and neck	 Explore how their own bodies move. Name common body parts – elbows, shoulders, ankles, back, fingers and toes 	 Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense Notice that humans have offspring which grow into adults Find out about and describe the basic needs for survival (food, water, air) Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene 	 Identify that humans need the right types and amount of nutrition and that they cannot make their own food – they get nutrition from what they eat Identify that humans have skeletons and muscles for support, protection and movement Describe the simple functions of the basic parts of the digestive system in humans Identify the different types of teeth in humans and their simple functions 	 Describe the changes as humans develop to old age Identify and name the main parts of the human circulatory system and describe the functions of the heart, blood vessels and blood Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function Describe the ways in which nutrients and water are transported within humans (and other animals)
Biology	Plants	✓ Watch seeds and plants grow.	 Observe plants and trees in their immediate environment and begin to talk about what they need to grow. 	 Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees Identify and describe the basic structure of a variety of common flowering plants, including trees Observe and describe how seeds and bulbs grow into mature plants Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy 	 Identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers Explore the requirements of plants for life and growth (air, light, water, nutrients from soil and room to grow) and how they vary from plant to plant Investigate the way in which water is transported within plants Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal 	

	Nursery	Reception	Years 1 & 2	Years 3 & 4	Years 5 & 6
Living Things their Habitat (Evolution & Inheritance – Y6 only)	S	 Discuss animals of their choice, focussing on what they look like, what they eat and where they live. 	 Explore and compare the differences between things that are living, dead and things that are living, dead and things that have never been alive Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other Identify and name a variety of plants and animals in their habitats Describe how animals obtain their food from plants and other animals using the idea of a simple food chain – identify and name different sources of food 	 Recognise that living things can be grouped in a variety of ways Explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment Recognise that environments can change and that this can sometimes pose dangers to living things 	 Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird Describe the life processes of reproduction in some plants and animals Describe how living things are classified into broad groups according to common observable characteristics and based on similarities and animals Give reasons for classifying plants and animals based on specific characteristics Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago Recognise that living things Identify how animals and plants are adapted to suit their environment and that adaptations lead to evolution

		Nursery	Reception	Years 1 & 2	Years 3 & 4	Years 5 & 6
	Rocks				 Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties Describe in simple terms how fossils are formed when things that have lived are trapped within rock Recognise that soils are made from rocks and organic matter 	
Chemistry	States of Matter (incl Properties & Changes)	 ✓ Explore the melting of ice (ice cubes/ice lollies) ✓ Cook and explore combining, heating and cooling ingredients. 	 Explore ice and other substances melting and solidifying. 		 Compare and group materials together according to whether they are solids, liquids or gases Observe that some materials change state when they are heated or cooled: measure or research the temperature at which this happens in degrees C (°C) Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature 	 Compare and group everyday materials based on their properties, including hardness, solubility, transparency, conductivity (electrical and thermal) and magnetism Know some materials dissolve in liquid to form a solution and describe how to recover a substance from solution Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic Demonstrate that dissolving, mixing and changes of state are reversible changes Explain that some changes result in the formation of new materials and that these changes are not usually reversible eg: changes from burning or the action of acid on bicarbonate of soda
